

Operation of Moored Balloons and Large Kites

FEDERAL AVIATION AGENCY

August 1959

NOTICE

Amendments to this manual will be priced and sold individually by the Superintendent of Documents. A status sheet listing the amendments and their prices will be sent periodically to interested purchasers of this manual.

If you wish to receive these notifications, please fill out the form below and return it to the Superintendent of Documents.

TO: Superintendent of Documents
U.S. Government Printing Office
Washington 25, D.C.

Please send me all notifications regarding amendments to Civil Aeronautics Manuals.

Introductory Note

This manual contains in consolidated form (1) Civil Air Regulations Part 48, Operation of Moored Balloons and Large Kites, dated December 29, 1954; and (2) the rules, policies, and interpretations issued by the Administrator of the Federal Aviation Agency in application to the various sections of the regulations.

FAA *rules* are supplementary regulations issued pursuant to authority expressly conferred on the Administrator in the Civil Air Regulations. Such rules are mandatory and must be complied with.

FAA *policies* provide detailed technical information on recommended methods of complying with the Civil Air Regulations. Such policies are for the guidance of the public and are not mandatory in nature.

FAA *interpretations* define or explain words and phrases of the Civil Air Regulations. Such interpretations are for the guidance of the public and will be followed by the Agency in determining compliance with the regulations.

This manual is arranged to give the number, title, and text of each section of the regulations followed by any rules, policies, or interpretations applicable to that section. These rules, policies, or interpretations of the Administrator are identified by consecutive dash numbers appended to the regulation section number.

As amendments and other pertinent materials pertaining to Part 48 are issued, they will be included in this manual.

Contents

	Section	Page
Scope	48.1	1
Operation of a gyroglider as a large kite (FAA interpretations which apply to sec. 48.1).	48-1-1.....	1

Operation of Moored Balloons and Large Kites

48.1 Scope. This part shall apply to moored balloons having a diameter of more than 6 feet or a gas capacity of more than 115 cubic feet and kites weighing more than 5 pounds when operated anywhere in the United States, including the several States, the District of Columbia, and the several Territories and possessions of the United States, including the territorial waters and the overlying airspace thereof.

48.1-1 Operation of a gyroglider as a large kite (*FAA interpretations which apply to sec. 48.1*). As used in this part the term "kite" includes a gyroglider operated by means of a towline attached to a vehicle on the surface. Such a device, therefore, must be operated in accordance with the provisions of this part. (Where the gyroglider is operated in free flight, it is considered to be an aircraft and must be certificated and operated in accordance with the applicable regulations for such aircraft.)

(Published in 22 F.R. 5978, July 30, 1957.)

48.2 General. Moored balloons having a diameter of more than 6 feet or a gas capacity of more than 115 cubic feet or kites weighing more than 5 pounds may be operated without permit from or notice to the Administrator when operated below 150 feet above the surface at a location more than 5 miles from the boundary of an airport. Kites and balloons of smaller size than specified herein are exempt from compliance with the regulations of this subchapter.

48.3 Operation requiring permit. Unless operated under the conditions specified in section 48.2, moored balloons or kites subject to the regulations in this part shall be operated under the authority of and in compliance with the terms and conditions of a permit issued by the Administrator when such kites or moored balloons are operated:

(a) Closer than 500 feet to the base of any cloud, or

(b) During the hours of darkness, or

(c) When ground visibility is less than 3 miles, or

(d) At altitudes more than 500 feet above the surface, or

(e) Within 5 miles of the boundary of an airport.

48.3-1 Conditions for issuance of a permit (*FAA policies which apply to sec. 48.3*). The procedure established for obtaining a permit for operation under this section is as follows:

(a) *Application.* Application for a permit will be made on Form ACA-400.¹

(b) *Inspection.* When the application forms are submitted to the local inspector, the applicant should make arrangements with the inspector for inspection of the balloon or kite. At such time as a balloon or kite is presented for inspection, the applicant will also be required to present for inspection the following suitable items of equipment which are to be used in the operation of the balloon or kite:

(1) A rope, cable, or other mooring device.

(2) A mechanism for raising or lowering the kite or balloon.

(3) When required by section 48.5, a device or means of rapid deflation.

(c) *Permit issued.* When the application has been approved, the applicant will receive a permit, Form FAA-663. This permit will list the operations approved, and will incorporate the special provisions and limitations applicable to the type of operation,² as well as any other conditions which the inspector deems necessary for reasons of safety.

(d) *Duration.* The permit will contain an expiration date which will allow ample time to complete the operation. However, such expiration date will not exceed 1 year from the effective date of the permit. It may be surrendered by the holder or cancelled by the Administrator at any time.

(e) *Transfer of permit.* A permit is not transferable. A person desiring to take over the operations authorized a holder of a current

¹ Copies of this form may be obtained from the local district office and should be filled out in ink or typed. See appendix D for a list of these offices. A sample application for each type of operation is shown in appendixes A, B, and C.

² See secs. 48.3-2 through 48.3-6 for these special provisions and conditions.

permit must submit a new application, which will be processed in the same manner as an original issuance.

(f) *Special provisions.* The permit will contain such special provisions or conditions as the approving inspector may deem necessary in the interest of safety or appropriate to good operating practices.

48.3-2. Operation closer than 500 feet to the base of any cloud (FAA policies which apply to sec. 48.3(a)). Permit for operation of a moored balloon or kite under this section will be granted by the Administrator, subject to the following conditions:

(a) The operation will be conducted only during the period specified in the permit.

(b) The operation will not jeopardize the safety of aircraft taking off, landing, letting down through the clouds, or operating en route; and

(c) The mooring cable for the balloon or kite is clearly marked at intervals with colored pennants or streamers visible for at least 1 mile; except that a towed kite, generally referred to as a gyroglider, need not have the towing-mooring cable marked at intervals with colored pennants or streamers unless in the opinion of the inspector such marking is necessary for reasons of safety to aerial navigation.

48.3-3 Operation during the hours of darkness (FAA policies which apply to sec 48.3(b)). Permit for operation of a moored balloon or kite under this section will be granted by the Administrator for operation without obstruction or hazard lighting, subject to the following conditions:

(a) The balloon or kite is operated in the congested area of any city or town at an altitude at which it is shielded by adjacent structures or buildings, so that it will not create an additional hazard to aircraft, or

(b) The operating location is such that any structure of the same height in the immediately adjacent area would not be considered an obstruction to air navigation as provided in TSO-N18,³ or

(c) The advertising displays or other similar forms of lighting on the balloon or kite afford a warning equivalent to that required for towers, poles, and similar obstructions.⁴

(d) When operation of the balloon or kite cannot be in accordance with paragraphs (a), (b), and (c) of this section, a permit may be granted, subject to the following conditions:

(1) The balloon or kite is equipped with at least two 100-watt lamps enclosed in aviation red fresnel or prismatic obstruction light globes, and installed in such manner as to insure their visibility to an aircraft approaching from any angle; except that a towed kite, generally referred to as a gyroglider, may be equipped with position lights normally required for rotorcraft at night when, in the opinion of the inspector, such lighting will provide safety to aerial navigation.

(2) The mooring cable for the balloon or kite is clearly marked at intervals with red hazard lights, visible in all directions. Spacing of lights should be such that the location of the cable is clearly defined; except that the towing-mooring cable of a towed kite, generally referred to as a gyroglider, need not be marked with hazard lights when, in the opinion of the inspector, such lighting is not necessary for reasons of safety to aerial navigation.

48.3-4 Operation when the ground visibility is less than 3 miles (FAA policies which apply to sec. 48.3 (c)). A permit for the operation of a moored balloon or kite under this section will be granted only under the following conditions:

(a) The balloon or kite is operated in the congested area of a city or town at an altitude at which it will be shielded by adjacent structures or buildings so that it will not create a hazard to aircraft, or

(b) The operating location is such that any other obstruction of the same height would not be considered an obstruction to air navigation as provided in TSO-N18.

³ TSO-N18, entitled "Criteria for Determining Obstructions to Air Navigation," may be obtained, without charge, from the Federal Aviation Agency, Aeronautical Reference Branch, Washington 25, D.C.

⁴ This information is included in CAA's "Obstruction Marking Manual," available from the Superintendent of Documents, Government Printing Office, Washington 25, D.C., price 30 cents.

48.3-5 Operation at altitudes more than 500 feet above the surface (*FAA policies which apply to sec. 48.3 (d)*). A permit will be granted for operation of a moored balloon or kite, subject to the following conditions:

(a) The mooring cable for the balloon or kite is clearly marked at intervals with colored pennants or streamers visible for at least 1 mile; except that a towed kite, generally referred to as a gyroglider, need not have the towing-mooring cable marked at intervals with colored pennants or streamers unless, in the opinion of the inspector, such marking is necessary for reasons of safety to aerial navigation.

(b) The location of the operation will not be considered an obstruction to aircraft operating on a civil airway, or approaching or departing from an airport, as provided in TSO-N18.

48.3-6 Operating within 5 miles of the boundary of an airport (*FAA policies which apply to sec. 48.3(e)*).

(a) A permit to operate a moored balloon or kite other than a gyroglider will be granted under this section, subject to the following conditions:

(1) The operation is not conducted within the approach area of any runway.

(2) The operation will not interfere with, or produce an obstruction to, aircraft in the traffic pattern.

(3) The mooring cable of the balloon or kite is clearly marked at intervals with colored pennants or streamers visible for at least 1 mile.

(4) The balloon or kite will not be operated closer than 500 feet below the ceiling.

(5) The operation will not be conducted when the visibility is less than 3 miles, or at night.

(b) A permit to operate a towed kite, generally referred to as a gyroglider, will be granted under this section for operation on or within 5 miles of an airport, subject to such conditions as the inspector deems necessary for safety to aerial navigation.

(Published in 22 F.R. 5978, July 30, 1957.)

48.4 Operation requiring notice. Unless operated under the conditions specified in

section 48.2 or section 48.3, written notice must be submitted to the nearest office of the Federal Aviation Agency at least 30 days prior to the date of operation when moored balloons or kites subject to the regulations in this part are operated between 150 and 500 feet above the surface. Such notice shall contain the name and address of the owner and person operating such balloon or kite, the date or dates of such proposed operation, and the location and altitude at which the proposed operation will be conducted.

48.4-1 Form and content of notice (*FAA policies which apply to sec. 48.4*). No particular form has been developed for use in giving notice of intent to operate a moored balloon, kite, or gyroglider under the provisions of section 48.4. Such notice may be in letter form, submitted in triplicate to the district office for the area in which the operations are to be conducted.

48.4-2 Action on notice (*FAA policies which apply to sec. 48.4*). Prior to the expiration of the 30-day notice, the applicant will be notified by the local district office to which notice has been given as to whether or not his proposed operation comes within the provisions of section 48.4.

(Published in 22 F.R. 5978, July 30, 1957.)

48.5 Rapid deflation device. No moored balloon having a diameter of more than 6 feet or a gas capacity of more than 115 cubic feet shall be operated unless it is equipped with a device or means of automatic and rapid deflation in the event of an escape from its moorings.

48.5-1 Acceptable rapid deflation device (*FAA policies which apply to sec. 48.5*). The device or means of automatic rapid deflation should:

(a) Be a device or method that has been expressly produced by a manufacturer for this purpose, and has demonstrated its reliability through previous use, or

(b) Be a device or method deemed by the inspector as adequate. In this connection, an inspector may require a demonstration of the device or method.

(Published in 22 F.R. 5978, July 30, 1957.)

U. S. DEPARTMENT OF COMMERCE CIVIL AERONAUTICS ADMINISTRATION APPLICATION FOR CERTIFICATE OF WAIVER		FORM APPROVED BUDGET BUREAU NO. 41-R075.8. APPLICANTS—DO NOT USE THESE SPACES
